

UNIQUE SOLUTIONS
UNIQUE SOLUTION FOR THE OFFSITE SECTOR
30MM LOADED SYSTEM PROVIDING
120 MINS FIRE PROTECTION

- 1 1.5mm Siniat Megadeco Board
- 2 1.5mm Promat PROMATECT 250 Board
- 3 EOS Façades steel frame
- 4 70mm Rockwool RWV3 Slab 60kg/m²
- 5 Air gap

This unique system combines two boards – Megadeco and PROMATECT 250 – to deliver 120 minutes fire protection on a point loaded modular steel frame building system.

It creates an internal lining thickness of just 30mm, which is significantly thinner than the traditional solution of three boards, creating additional net lettable floorspace.
