

**UNIQUE SOLUTIONS**
**UNIQUE SOLUTION FOR THE OFFSITE SECTOR  
THROUGH WALL SOLUTION**

- 1 Siniat Internal Board to suit specification
- 2 EOS Façades steel frame
- 3 Rock Mineral Wool insulation to meet specification
- 4 1.5mm Siniat Weather Defence external sheathing board
- 5 Additional Cavity Insulation
- 6 Brick tie system to manufacturer's guidelines
- 7 Brickwork Cladding

Etex Building Performance can provide many of the components of a building envelope, from steel frame systems to sheathing boards and boards for the conditioned environment.

With these components, our engineers have created unique through-wall solutions which are transforming building envelope construction and performance.

Central to this is Weather Defence, an award winning gypsum board whose unique characteristics offer excellent fire performance, air tightness and high sound insulation.
